

# Stun Guns

By Liquid Bullet

# Tazer Gun

**This TAZER fires from 15 feet away wit laser accuracy** and he most powerful take-down power available today. TAZER weapones are “stun guns” that shoot electrodes 15 feet that penetrate the skin and thick clothing to deliver a disabling VOLTAGE to the attacker. TAZER stun guns devices override the central nervous system for the most effective take-down power available today.

Simply load a cartridge onto the end of the Tazer and turn on when necessary.

When ready to shoot simply push the ‘fire’ button and 2 teel pins with wires connected to your gun will shoot out up to 15 feet and penetrate up to almost 1 centimeter.

Hold the buttom down to “Stun” your attacker.

Cartridges cabn be shot once and then must be disposed of. Kit includes 3 cartridges. Once cartridge is fired the actual gun can double up as a stun gun.

## Features:

- 1 800 000V Tazer/Stun gun
- 3 Cartridges
- 1 Tazer Pouch
- 1 Charger
- 1 Laser (Attached to Stun gun)

# 800 Type Stun Gun

## Key Specifications / Special Features:

- KL-800D type stun gun
- 9.8 million volts
- Double shock prongs
- Built-in flashlight
- Leather carrying case with belt clip
- 5 built-in rechargeable batteries
- Built-in wall charger ( 110V & 220V )
- Dimensions: 4.25" x 2" x 1"

# 8 Type Stun Gun

669 self defence stun gun with flashlight

## Function:

Strong light flashlight, high voltage electric shock

## Specifications

1. Source voltage: 7.2 V  
Output pulse voltage: 1 200 00 V
2. Current consumption  
<1.9A ( for electric shock )  
<0.8A ( for illumination )
3. Size: 24 x 46 x 140 ( mm )
4. Environmental temperature: -5 F ~ 113 F
5. Gross weight / Net weight: 265g / 160g

# 928 Type Stun Gun

## Features as follows:

- Adopt High frequency oscillation circuit to improve output current. The large capacity DC discharge, the output energy is above 5 times than the original pulse type electronic riot.
- Heavy Duty ultra bright LED flash light, AAAAAAA circulation charging and the battery durability is high.
- Adopt inner charger input and convenient to carry.
- Aluminum alloy shell and fashion Design.

## Specifications

1. Source voltage: 7.2 VDC
2. Current capacity:  $\geq 2.5$  A
3. Output pulse voltage:  $> 4000$  kv

# 1108 Type Stun Gun

## 3 in 1 Self Defence Tool

1. High Voltage Personal Protection Device
2. Super LED flashlight with 3 brightness settings
3. Built-in siren
4. Rechargeable battery
5. Waterproof
6. Aircraft-grade aluminum

## Specifications

1. Use enclosed charger input 220 - 240 V power
2. Run time: 4 hours
3. LUX: 500 Lumens ( Max output )
4. Power input DC 4.8 V
5. Current: > 2.5 A
6. Size: 240 x 47 x 28 ( mm )
7. Power output:1000 kv
8. Weight: 314 kg

# 1109 Type Stun Gun

## Product Features:

- Self Defence
- LED Torch

## Specifications

1. Source voltage: 7.2 VDC
2. Current capacity: AA 2.5.A
3. Output pulse voltage: > 4000 V

Self defence multiple functional rechargeable LED torch  
Different type: heavy duty product

Features as follow:

1. Adopt high frequency oscillation circuit to improve output current, large capacity DC discharge, the output energy is above 5 times than original pulse type electronic riot
2. Heavy duty ultra bright LED flashlight, AAAAAAA circulation charging and the battery durability is high
3. Adopt inner charge input and convenient to carry
4. Aluminium alloy shell and fashion Design

# 1101 Stun Gun Flashlight

## Features as follows:

- Big capability AC discharge circuit, high voltage, good personal protection equipment.
- Super LED flash light save energy more durable.
- Chargeable.
- Beautifully designed.
- Aircraft-grade aluminum, HA III anodic oxidation.

## Usage:

1. Use enclosed charger input to 220 V power, and outplug input to the stun gun, the indicator will be on. Be sure to fully charge the unit for 12 hours before the first use to maximize battery life.
2. Push toggle switch up, the lighting, the toggle switch is pushed down to the bottom, pressing the electric switch, you can use electric shock, electric shock must not use lighting.

## Specifications

1. Power input: DC 4.8 V
2. Current:  $\geq 2.5$  A
3. Power output: 1000 kv
4. Size: 165 mm x 35 mm x 28 mm
5. Weight: 180g

# TW Keychain Stun Gun

## Usage:

1. Before using, it should be fully charged at least 2-4 hours, insert the USB connection into the computer's USB interface or mobile phone charger; when charging, the indicator light turns red. After fully charged, the red light will go out.
2. Push the functional switch to the OFF symbol, it is turned off with no functions left.
3. Toggle the functional switch to the ON symbol, press the LED control button in the center of the product, the light will be at work. Push up the shock control button, the shock will be launched and the light will be auto-off.
4. Shocking will be stopped for protection after continuously shocking for 10-12 seconds. If required, please push the shock control button again.

## Specifications

1. Input voltage: 5 VDC
2. Current capacity:  $\geq 1.8$  A
3. Output voltage:  $> 100$  kv
4. Weight: 52g
5. Size: 89 mm x 25 mm x 17 mm
